

**Hyde County Restaurant Sanitation Scores for the 1st Quarter of 2009-2010 Fiscal Year
July 2009 – September 2009**

The Health Department conducts inspections of food service establishments (restaurants, food stands, school lunchrooms, etc.) on a regular basis. Food service establishments are placed into various categories due to the complexity of food handling. Some restaurants are still inspected on a quarterly basis, however some are inspected once every four months, & others are inspected once every six months. Below are the 3rd quarter sanitation scores for Hyde County.

Please note that there are some food service establishments not listed. Such establishments were not inspected in the 3rd quarter due to being closed at the time of visit.

**Indicates a 2 point bonus to final sanitation score for having participated in a NC approved food safety course.
